## Whole House Filtration & Conditioning System

### WHY H2 ZERO?

- ZERO ELECTRICITY
- ZERO BACKWASH
- ZERO MAINTENANCE

#### IMPORTANT!

Your system will not be ready for use for a minimum of 48 hours while the carbon soak process takes place. Please plan your installation accordingly.

If you do not follow this step the water may become discolored and carbon fines may enter the home.

### Installation at a Glance

**WARNING:** Do not use with water that is microbiological unsafe or of unknown quality without adequate disinfection before or after the system. Intended for use treatment of cold water only. Do not exceed 80 psi. Intended for residential use only.

**NOTE:** The HALO filtration systems are intended for treatment of potable water provided by municipal water providers. While the HALO Filtration Systems may be effective for treatment of well water it is vital that a well water quality analysis be provided for review and recommendation in to ensure that optimum results can be realized. Failure to provide a current well water report to HALO Water Systems for analysis and recommendation voids all warranties.

### Tank 1:

#### HALO HAC/KDF55

HAC is an outstanding material for successfully reducing free chlorine from water supplies. The end product is clean, fresh water with no objectionable taste or odor characteristics. Additionally, HAC can be used for filtering waters having a wide range of pH levels and will impart a high “polish” to the filtered water.

**10 year warranty on HALO HAC/KDF55 media.**

### Tank 2:

#### HALO Scale Media

Scale media granules provide nucleation sites that cause dissolved calcium, magnesium and bicarbonate to combine into microscopic crystals. Once formed, these crystals detach from the media, and flow freely through the system.

**5 year warranty on scale media.**
